Fuel Flux Pvt. Ltd. | [View]

Software Developer Intern

Remote

Sep 2025 – Oct 2025

- Engineered **Flask-based backend APIs** and integrated responsive frontend, reducing page load time by **20%**.
- Integrated **Razorpay payment gateway** with secure transaction workflows and error handling.
- Built **real-time license plate detection system** using OpenCV, enabling automated vehicle tracking.
- Designed **traffic queue monitoring system** using computer vision, reducing manual oversight by **75%**.

PROJECTS

BAAS (Bot-as-a-Service) | Python, FastAPI, MongoDB, React, LangGraph, SentenceTransformers [Live] [Github]

- Built a secure **multi-tenant SaaS platform** with strict **tenant isolation** to prevent cross-client data leakage.
- Created a **hybrid PDF processing pipeline** to extract both textual and visual context from complex documents.
- Implemented **semantic retrieval** for fast and context-aware document search across knowledge bases.
- Optimized a two-stage **RAG workflow** with dynamic token allocation to reduce **latency** and **LLM costs**.

Loki - Git-like Version Control System | Go, CLI

[Github]

- Developed a **Git-inspired version control system** implementing core commands (init, add, commit, log).
- Designed internal **DAG-based commit graph** for version history tracking and state management.
- Implemented **object storage system** (blobs, trees, commits) using SHA-1 hashing and efficient file structures.
- Planned extension: integrate **code analysis engine** for automated debugging and test case generation.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript
